

KIDS TOOTH RESTORATION: STAINLESS STEEL CROWN

Carefully crafted without the use of any chemical surface treatments or final coatings, meticulously polished to a flawless finish

Perfectly replicates natural tooth anatomy, enhancing both fit and functionality

Comes pre-trimmed, belled, and crimped to ensure a quick and hassle-free placement

Designed with the ideal occlusal thickness to provide superior resistance against wear and perforation

Ultra-high quality 300L-Series surgical grade stainless steel

The malleability in the gingival margin and lateral areas ensures a snap fit and easy placement over the natural undercuts of a primary molar

Offers a comprehensive range of 48 distinct sizes, with 6 options per molar, allowing for a precise and snug fit

Features laser-etched markings
